

File Name: **7-zip.dll**

Date Stamp: 2019-02-21T08:00:00

No. of Sections: 6

The imports are:

1. GDI32.dll
2. ole32.dll
3. USER32.dll
4. ADVAPI32.dll
5. SHELL32.dll
6. MSVCRT.dll
7. KERNEL32.dll

Please click [here](#) for detailed imports.

The sections are :

Section Name	Virtual Address	Virtual Size	Actual Size
.text	0x1000	31702	31744
.rdata	0x9000	10498	10752
.data	0xc000	300	512
.sxdata	0xd000	4	512
.rsrc	0xe000	1984	2048
.reloc	0xf000	3806	4096

The virtual and raw size of the file can be used to decide if the file is packed or not. Except the .data section, if the program raises other size flags, the file may be packed.

Some conclusions about the file from the python program. The messages are presented as python lists.

- ['The size flags raised are', []]
- ['The OS path strings extracted were = ', []]
- ['The URL extracted from strings were = ', []]
- ['The match found with the existing signature database were = ', ['Armadillo v1.xx - v2.xx']]

File Name: **7zG.exe**

Date Stamp: 2019-02-21T08:00:00

No. of Sections: 6

The imports are:

1. COMCTL32.dll
2. comdlg32.dll
3. GDI32.dll
4. OLEAUT32.dll
5. ole32.dll
6. USER32.dll
7. ADVAPI32.dll
8. SHELL32.dll
9. MSVCRT.dll

## 10. KERNEL32.dll

Please click [here](#) for detailed imports.

The sections are :

Section Name	Virtual Address	Virtual Size	Actual Size
.text	0x1000	267874	268288
.rdata	0x43000	53962	54272
.data	0x51000	10032	1024
.sxdata	0x54000	4	512
.rsrc	0x55000	23960	24064
.reloc	0x5b000	17072	17408

The virtual and raw size of the file can be used to decide if the file is packed or not. Except the .data section, if the program raises other size flags, the file may be packed.

Some conclusions about the file from the python program. The messages are presented as python lists.

- ['The size flags raised are', ['.data\x00\x00\x00']]
- ['The OS path strings extracted were = ', []]
- ['The URL extracted from strings were = ', []]
- ['The match found with the existing signature database were = ', ['Armadillo v1.71']]

File Name: **DbgHelp.dll**

Date Stamp: 2010-02-01T12:08:26

No. of Sections: 4

The imports are:

1. msvcrt.dll
2. KERNEL32.dll

Please click [here](#) for detailed imports.

The sections are :

Section Name	Virtual Address	Virtual Size	Actual Size
.text	0x1000	1124275	1124352
.data	0x114000	114828	18432
.rsrc	0x131000	1008	1024
.reloc	0x132000	61038	61440

The virtual and raw size of the file can be used to decide if the file is packed or not. Except the .data section, if the program raises other size flags, the file may be packed.

Some conclusions about the file from the python program. The messages are presented as python lists.

- ['The size flags raised are', ['.data\x00\x00\x00']]

- ['The OS path strings extracted were = ', []]
- ['The URL extracted from strings were = ', []]
- ['The match found with the existing signature database were = ', None]

File Name: **ieexplore.exe**

Date Stamp: 2018-05-24T20:10:09

No. of Sections: 6

The imports are:

1. msvcrt.dll
2. KERNEL32.dll
3. api-ms-win-downlevel-advapi32-l1-1-0.dll
4. iertutil.dll
5. api-ms-win-downlevel-shlwapi-l1-1-0.dll

Please click [here](#) for detailed imports.

The sections are :

Section Name	Virtual Address	Virtual Size	Actual Size
.text	0x1000	18173	18432
.data	0x6000	1312	1536
.idata	0x7000	2272	2560
